

Be smart about your security.

Let a Bosch Solution 2000 & 3000
protect your home & family

Keeping your home and family safe doesn't need to be complicated. That's why we've made the Solution 2000 & 3000 security systems so easy to use – all it takes is "one touch."

BOSCH

Invented for life

Solution 2000 & 3000 – Security you can rely on.

You've worked hard for the things that you own. Your home is your sanctuary. If an intruder breaks into your home, the loss you feel is not just about the items destroyed or stolen - they can be easily replaced. What you lose is the peace of mind and that sense of security that your home once provided. The Solution 2000 & 3000 alarm panel series from Bosch Security Systems offers you the perfect solution. We've created a security system that has all the technology it needs to identify intruders to your home, without being hard to use. It helps you protect the things you love, providing you with reliable home security at your fingertips.

Simple to use,
with plenty of
flexibility

It's your home... the alarm should work your way.

The Solution 2000 & 3000 intrusion panels have a variety of codepad options that allow you to tailor the user experience to your style and your home.

The LCD Icon codepad offers a small and inobtrusive interface to complement the decor of any home. The simple Icons make it easy to identify the status of your system at all times.

The LCD Alphanumeric codepad displays information in real text allowing you to quickly identify the cause of any alarm, and even to control multiple household areas simultaneously (such as separating the main house and an external garage or shed).

The Touchscreen codepads allow you to turn your intrusion panel in to a true lifestyle product with a variety of simple to use and aesthetically pleasing options and additional features.

Tomorrow's communications, available today.

With large-scale broadband communications already a reality in Australia and New Zealand, and the installation of services such as the National Broadband Network, knowing how your intrusion panel is going to handle and report alarms is becoming increasingly important.

While offering the same telephone line capabilities as existing intrusion panels, the Solution 2000 & 3000 also have available a range of communications extension modules that integrate directly with the panel and provide options such as mobile communications via the GSM & GPRS networks, along with IP reporting through the Internet.

The IP connection option makes the panel fully NBN ready with the majority of monitoring centres in Australia & New Zealand able to handle the IP communications from the Solution 2000 & 3000. Enjoy the higher security of polled monitoring with no call costs.

Home security... at your fingertips.

Away from home and want to make sure you armed the alarm? Want to open the garage door but the kids have hidden the remote? Just load up the Bosch Remote Security Control¹ app and you'll have full control of your intrusion panel through your AndroidOS or IOS smartphone.

Arm and disarm your system, trigger outputs to run external devices (such as roller doors, air conditioning units, or smart lighting systems), or simply check what time the kids left in the morning for school – all of these features and more are built in to the intuitive and quick Bosch RSC app.

Choose the way you want to use your system, including Touch Screens & wireless remote control options.

Ready for the wireless world.

Enjoy easy control of your Solution 2000 intrusion panel with the inclusion of wireless keyfobs that allow you to arm & disarm your system, control external outputs and even trigger a panic alarm if you are unable to reach the panel's codepad.

Alternatively, experience the true power of wireless with the Solution 3000 which includes the option to integrate with the Bosch RADION range of wireless transmitters. With a growing suite of wireless products such as motion sensors, door & window reed switches, and remote keyfobs, Bosch RADION will create new options for how you manage your home security.

Flexibility, agility, and piece of mind.

Supporting up to 8 fully programmable zones on the Solution 2000 and 16 fully programmable zones on the Solution 3000, this range of intrusion panels is suitable for any home, and even some commercial premises.

With support for up to four codepads on both panels and the ability to be split in to two separate partitions on the Solution 3000, you have the flexibility of one security system that can act as two. Both the house and garage/granny flat can be covered by the one system at one cost. Each partition can even report to a different monitoring centre if desired – the perfect arrangement for shared premises such as duplex houses or commercial properties.

Features:

- 8/16 Fully Programmable Zones
- 41 Codes – 1 Installer, 20 User Codes, 20 RF Keyfobs
- 16 Wireless Devices (on Solution 3000)
- Partitionable in to 2 Separate Areas
- STAY / AWAY Arming Options
- Selectable Reports per User Code
- Entry and Exit Warning
- Automatic Arming
- Remote Arming
- Zone Lockout
- 256 Event History Memory
- LCD Icon, LCD Alphanumeric, and Touchscreen Support
